Class A (USD) Share Class - SIG|Lyrical Long/Short Fund, a sub-fund of Strategic Investment Funds UCITS Plc.
(ISIN IE00BQRRX952)

Objectives and Investment Policy

The Fund's objective is to achieve long-term capital growth while reducing the risk of capital loss.

The Fund will invest principally in US equities, which it aims to acquire at a market value substantially above or below their intrinsic value.

The portfolio shall typically be composed of 30 to 40 different equities, which are listed in the US although the investments shall not be subject to any geographical limitation. The Investment Manager will invest in medium and large capitalisation companies. The Fund may also take short positions in US listed equities via Equity Swaps. The notional amount of short positions is expected to range from 35-60% of the Fund's Net Asset Value in aggregate.

The Investment Manager believes that a value-based approach is best suited to achieving the Fund's investment objective and is consistent with the investment experience of the Investment Manager.

To identify situations with attractive investment characteristics, the Investment Manager maintains a proprietary stock selection model. This model is based on historical earnings, consensus earnings estimates, and consensus estimates of short, medium and long-term earnings growth to calculate an intrinsic value estimate for every planned security investment.

The Investment Manager continually monitors changes in the securities of the portfolio of the Fund, and regularly re-evaluates them. The Investment Manager shall seek to close positions of the Fund either when it approaches its intrinsic value or when the Investment Manager determines a better use of capital in other investments

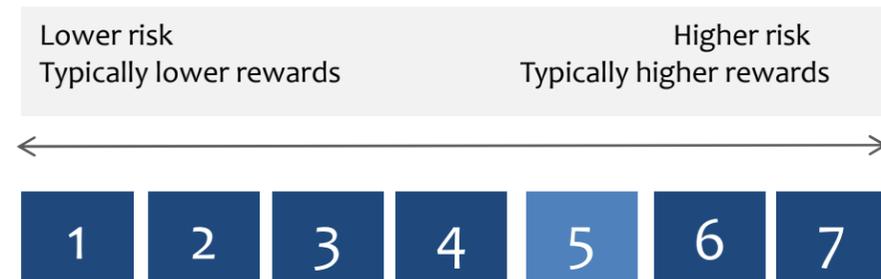

The Fund will invest in financial derivative instruments, namely Equity Swaps.

The units in the Fund are accumulating units. Income from the Fund's investments will be included in the value of the units rather than being paid out as a dividend.

Investors may subscribe or redeem on a weekly basis. Please refer to the definition of Dealing Day in the supplement.

In light of the investment policies of the Fund, an investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors. It is suitable for those who understand the degree of risk involved, and can tolerate a medium to high level of volatility that is generally associated with an equity fund. An investment in the Fund should be

Risk and Reward Profile

The risk category is calculated using historical data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may change over time. The lowest category, 1, does not mean risk free.

The Fund is rated 5 due to the nature of its investments which include the risks listed. As the fund is invested in equities and derivatives (Equity Swaps) it is susceptible to market movements and fluctuations.

There is no guarantee that the investment objective of the Fund will be achieved. The Fund is not capital guaranteed.

Additional Risks

Model Risk

The risk of any inaccuracy, flaw or limitation in the Investment Manager's research.

Short Exposure Risk

The Fund will have a synthetic short exposure through swaps. In a generally rising market, the Fund's short positions may be more likely to result in losses because securities may be more likely to increase in value. Short exposure involves a finite opportunity for appreciation, but a theoretically unlimited risk of loss.

Swaps Risk

Trading swaps is highly speculative and prices of derivatives can be and often are more volatile than prices of other securities.

Political Risk

Risk arising from changes in government policies such as tax or any other political changes that may affect the value of the Fund's assets.

Equity Securities Risk

This includes the risks of fluctuations in market prices, adverse issuer or market information and the fact that equity interests are subordinate in the right of payment to other corporate securities, including debt securities.

Interest Rate and Currency Risks

Fluctuations in short-term and/or long-term interest rates or currency exchange rates may affect the value of the shares.

Medium Capitalisation Companies Risks

The fund may invest in medium-sized market capitalisation companies upon emergence from a restructuring or a bankruptcy which may involve higher risks in some respects than do investments in stocks of larger companies.
